Approved by PCI - New Delhi (531), Govt. of Maharashtra & DTE - Mumbai (5443).

Affiliated to Savitribai Phule Pune University - Pune (CPHN020560) & MSBTE - Mumbai (1952). AISHE: C-55802.

1.3.3 - Number of students undertaking project work/field work/ internships

The **Experiential Learning Institute** organized a **Hospital Visit** to **Apex Hospital, Satana** during the academic year **2023-2024** for its students. The primary objective of the hospital visit was to provide students with hands-on experience and insight into the various departments of a hospital, including **dispensing, compounding, the medical store department, and both inpatient and outpatient services**. This visit aimed to help students understand the practical aspects of hospital operations and the role of healthcare professionals in different settings.

Additionally, the **Institute arranged an industrial visit** for **third-year B. Pharm students** to familiarize them with the industrial processes and manufacturing operations from a practical perspective. The objective of this visit was to provide a real-world understanding of how the pharmaceutical industry functions and the intricacies involved in manufacturing processes.

For **final-year B. Pharm students**, the institute offers **Project Work** as part of their **Practice School** in **Semester VII** and **Semester VIII**. These projects are guided by department-wise faculty mentors and provide an opportunity for students to apply theoretical knowledge in practical scenarios. The focus of the project work is to foster skills in **research methodology, literature surveys, work planning, setting objectives**, and conducting surveys, as well as **hospital research work**.

The **industrial training** for final-year students is designed to offer exposure to real-world industrial settings, ensuring that students are equipped with the necessary skills for their professional careers.

For **M. Pharm students**, the final project work involves a **presentation** at the end of the semester, aimed at showcasing their research findings and methodologies. The primary objective of this project work is to develop **innovative skills** in **analysis, critical thinking, and experimental learning**. Students are expected to demonstrate their capabilities in **research**, including **modeling, computations**, and the **publication of research work**. Through this project, students learn how to conduct a **comprehensive literature review**, form a structured **work plan**, and engage in **hospital-based research**, providing them with practical and research-oriented experience.
